V S	elect the application server platform for deploying your EJB from the list of supported servers
•	
;	Weblogic Application Server 5.1
Ċ	ou can optionally compile EJB classes and generate a deployment descriptor during this proces on some servers, you can optionally "not" deploy. 'ou can also opt to delete temporary files after deployment.Check the options you want below
Œ	Process options
,	Add libraries, required for deployment, to the project Search/Classpath
	✓ Verify/Correct EJB sources for compliance with WLS5.1 requirements
	☑ Compile classes from the selected diagram 4506
	☑ Generate Deployment Descriptor 4508
	4010
2	☑ Open XML Editor for the generated DD  4512
, ,	Process Serviet(s)
	☑ Hot Deploy (use "Start Weblogic Application Server 5.1" or start the server manually)
Sec.	☑ Generate simple JSP client 4514
	☑ Clear temp folder before start
	☑ Clear temp folder after finish
